

Get there first.™

IRIS PROVIDES CONFIGURABLE SOFTWARE SOLUTIONS TO THE FRONT- AND MIDDLE-OFFICE OF TIER 1 SECURITIES FIRMS. WE BRING TOGETHER AN UNBEATABLE COMBINATION OF FINANCIAL MARKETS EXPERTISE, APPLIED TECHNOLOGY LEADERSHIP, AND SPEED.

Get There first™ with Iris.

Iris Financial Solutions provides configurable software solutions to the front- and middle-offices of the world's tier 1 securities firms.

We are a fast-growing, global firm with offices in New York, London, San Francisco, and Tokyo.

Our Core Markets

We work in high-value and high-impact areas where our customers focus on making money quickly.

- Trading - our tier 1 trading solutions provide a comprehensive range of core trading functionality that enables our customers to price, trade, and manage positions across complex global trading operations.
- Portfolio & Position Management - our high-performance, high-volume solutions support trading and risk management through real-time position updates across multiple desks and asset classes to optimize trading decisions.
- Trade Management & Processing - our solutions automate and streamline the middle-office of tier 1 banks. We increase the profitability of our customers' trading operations by providing a single-solution, multi-asset approach to trade management and processing.
- Risk Management - our multi-asset, high-capacity solutions provide an enterprise-wide view on risk, monitoring risk exposures across all portfolios to provide timely analysis of a firm's holdings on-demand and in real-time.
- e-Trading - with the exponential increase in volumes across all instruments, even the most complex, our solutions automate the entire electronic trading lifecycle, including connection to electronic venues, pricing, internal crossing, quoting, and risk management - all in real-time.

"Iris has proven time and again that they have deep understanding of the unique needs of global banks and can deliver powerful, reliable technology solutions to leading firms in that market."

NIKKO SYSTEMS SOLUTIONS

The Fastest Route from Innovation to Money.™

We have a 15-year history of working with our customers to turn their innovation into money.

- Program trading - we launched one of the world's largest banks into the program trading business, and within six months, they were the largest program trading operation in the world.
- Trading and Position Keeping - we developed the first globally distributed trading and position keeping system for the high yield business of one of the world's top 10 banks, enabling them to create a seamless global trading desk.
- We delivered a global pricing solution for the mortgage, US treasury, Euro government, and FX desks of one of the world's three largest banks.
- We delivered the first exceptions-based trade processing solution to one of the world's five largest banks, supporting their global DMA, portfolio trading, and cash trading businesses.

Iris Configurable Applications

Our highly configurable and adaptable software solutions meet our customers' unique business needs today, yet are extensible so that our customers can quickly and easily change the applications as new business opportunities arise.

Iris Equity Trader™

Iris Equity Trader™ addresses the complete range of equity trading styles, including single stock/block trading, DMA, algorithmic trading, and list/program trading.

Iris Equity Trader delivers full trading functionality: order management, market data management, trading, position management, risk and analytics, trade management, and maintenance functions.

Iris Fixed Income Trader™

Iris Fixed Income Trader™ addresses a complete array of fixed income instruments and derivatives, including interest rate, credit, high yield, mortgages, and structured products.

Iris Fixed Income Trader includes full fixed income trading functionality: pricing, trading, position management and risk, quote management, and ECN connectivity.

Iris FX Trader™

Iris FX Trader™ addresses the full range of foreign exchange instruments, with comprehensive front-office functionality: pricing, quote management, trading, position and risk management, and ECN connectivity.

Iris Hedge Fund Manager™

Iris Hedge Fund Manager™ addresses each stage of the alternative investment lifecycle, including trading, portfolio and position management, trade management and processing, and risk.

Iris Trade Manager™

Iris Trade Manager™ enables firms to significantly increase the profitability of trading operations by providing a single-solution approach for multi-asset trade management and processing, including automated block, DMA, and basket trade capture and processing, allocation management, confirmation, ticketing, and audit trail generation.

Iris Risk Manager™

Iris Risk Manager™ provides full functionality to analyze the risk imbedded in your positions, including real-time position, P&L, and risk management.

How We Do It: The Iris Innovation Platform™

The Iris Innovation Platform™ is our breakthrough set of configurable technology and business components that lets us configure and deliver our solutions faster than otherwise possible.

Iris Innovation Platform benefits:

- Rapid assembly of solutions from an inventory of pre-built business and technology components that are common across all financial services applications.
- Ability to focus on the important part of your solution - the final, highly configurable layer that lets us capitalize on the sweet spot of your business, the part that makes your firm unique.
- Time spent on high-value customization and configuration to solve business problems - not on low-value coding.
- Transfer of the technology to your firm, so that you can update and evolve your Iris configurable application to keep pace with the changes in your business for many years to come.
